# RESULTS CHIROPRACTIC A Family Wellness Center John S. Urban III D.C.

### **Minor Consent Form**

	has my	permission	i to be
treated without parent			
Signature (Parent or Guardian)		Date	
Witness		Date	

# Results Chiropractic Inc. A Family Wellness Center Terms of Acceptance/Informed Consent

When we accept you as a patient into our practice, it is important that you understand the objectives of our care.

Chiropractors provide a unique service that other healthcare providers do not offer: the location and correction of vertebral subluxations (spinal nerve stress in your body.)

A vertebral subluxation is a misalignment or distortion of your spinal column or related structures that can affect your brain, nervous system and overall body function. Subluxations can cause dis-ease or loss of proper body function.

Chiropractors spend years studying how to locate and correct this destructive condition, first by analyzing your body structure (especially your spine) using various methods. Second, we correct or adjust your subluxations by using specialized techniques (spinal adjustment.) When your spine and nervous system are free from the deep stress of vertebral subluxations you function more efficiently and your natural healing ability, your inner healer, will better communicate through your body.

We do not medically diagnose or treat any disease, symptom or condition. No matter what condition(s) you may have been diagnosed with and no matter what symptoms(s) your body is expressing, you always need a body free from subluxations.

If, during the course of our chiropractic spinal examination, we encounter unusual findings, we will let you know of them. You may then decide whether you wish to investigate further and discuss your healthcare options with other healthcare professionals. We will cooperate with you and with them in your goals.

To summarize: the purpose of chiropractic care is not to treat the diseases or conditions, not to suppress symptoms, nor to perform surgery, but rather to make your body function better by removing spinal nerve stress (subluxations). Therefore we don not prescribe surgery or medications. If you wish to decrease or stop medications you should discuss that with your MD.

Our objective is to eliminate a major interference to the expression of your physical/emotional health and healing-vertebral subluxations — so that your natural healing ability and your inner healer may function without this severe form of stress.

#### RESULTS CHIROPRACTIC INC. A Family Wellness Center Terms of Acceptance/Informed Consent

When we accept you as a patient into our practice, it is important that you understand the objectives of our care: Chiropractors provide an unique service that other healthcare providers do not offer: the location and correction of vertebral subjuxations (spinal nerve stress in your body). A vertebral subluxation is a misalignment or distortion of your spinal column or related structures that can affect your brain, nervous system and overall body function. Subjuxations can cause disease or loss of proper body function.

Chiropractors spend years studying how to locate and correct this destructive condition, first by analyzing your body structure (especially your spine) using various methods. Second, we correct or adjust your subluxations by using specialized techniques (spinal adjustment). When your spine and nervous system are free from the deep stress of vertebral subluxations you function more efficiently and your natural healing ability, your inner healer, will better communicate through your body.

We do not medically diagnose or treat any disease, symptom or condition. No matter what condition(s) you may have been diagnosed with and no matter what symptom(s) your body is expressing, you always need a body free from subluxations.

If, during the course of our chiropractic spinal examination, we encounter unusual findings, we will let you know of them. You may then decide whether you wish to investigate further and discuss your healthcare options with other healthcare professionals. We will cooperate with you and with them in your goals.

To summarize: the purpose of chiropractic care is not to treat the diseases or conditions, not to suppress symptoms, nor to perform surgery. but rather to make your body function better by removing spinal nerve stress (subluxations). Therefore, we do not prescribe surgery or medications. If you wish to decrease or stop medications you should discuss that with your medical doctor.

Our objective is to eliminate a major interference to the expression of your physical/emotional health and healing vertebral subluxations so that your natural healing ability and your inner healer may function without this severe form of stress.

We invite you to discuss with us any questions regarding our services. The best health services are based on a friendly and mutual understanding between the provider and patient.

I authorize the performance of any necessary diagnostic tests and treatments, which usually include chiropractic manipulation (CMT) for my condition(s). Like most health care procedures, CMT carries with it some risks. Unlike other medical treatments, the serious risks associated with CMT are extremely rate. Included are soreness or initial increased pain symptoms. More rare is dizziness, nausea or flushing, susceptibility of fracture with conditions like osteoporosis. Herniated or bulged discs may worsen even with CMT—it is important to notify the doctor of changes in symptoms. Extremely rare is a risk of a certain type of stroke, although this risk is the same with primary medical care and is associated with the nature of neck pain and headache presented by the patient.				
Notice to Medicare Patients				
Relative Contraindications: Do you have any of the following conditions?				
☐ Joint Hypermobility, ☐ Osteoporosis/Osteopenia, ☐ Benign Bone Tumors, ☐ Bleeding Disorders, ☐ Blood Thinners, ☐ Progressive Radiculopathy				
NOTE: If you currently have, or have had, one of the above listed conditions, Medicare requires that we advise you that spinal manipulation and other forms of dynamic thrust may be contraindicated in your condition. By signing below, you consent to care and agree to inform this office if another healthcare provider tells you that you have one of these conditions.				
Absolute Contraindications of given area: Do you have any of the following conditions?				
☐ Rheumatoid Arthritis, ☐ Spinal Cancer, ☐ Ankylosing Spondylitis, ☐ Ligament Laxity, ☐ Joint Dislocation, ☐ Recent/Unstable Joints, ☐ Unstable/Missing Dens at C2, ☐ Spinal/Joint Infection, ☐ Myelopathy/Cauda Equina Syndrome, ☐ Vertebrobasilar Insufficiency Syndrome, ☐ Arterial Aneurysm				
NOTE: If you currently have, or have had, one of the above listed conditions, Medicare requires that we advise you that spinal manipulation and other forms of dynamic thrust is absolutely contraindicated in the region of the spine that is affected. By signing below, you agree to inform this office if another healthcare provider tells you that you have one of these conditions.				
I understand the above information and guarantee this form was completed correctly to the best of my knowledge.
